

# About NATURE KAKIS

2023 marks 60 years since founding Prime Minister Lee Kuan Yew kickstarted Singapore's first nation-wide greening campaign.

The community played a key role in subsequent decades to green up Singapore and conserve our natural heritage.

Today, the community continues to be active in City in Nature initiatives, programmes and activities.

We aim to establish Nature Kakis chapters in every precinct that can self-organise and lead programmes for the community and by the community, with support from partners, grassroot organisations and agencies including NParks and PA.

**The Nature Kakis Network is a platform that will help grow our City in Nature in the heartlands, as well as encourage greater appreciation and community stewardship for our City in Nature.**

Refer to the inside of this brochure on some programmes that Nature Kakis can participate in or help implement and organise.

## Interested to join us?

Get in touch with the Nature Kakis chapter in your precinct by scanning the QR code or visit our website at <https://go.gov.sg/naturekakis>.

If your neighbourhood does not have a Nature Kakis chapter yet, we invite interested individuals to get the ball rolling! Fill out the form at <https://go.gov.sg/naturekakis> or scan the QR code.

## Let's Contribute

Corporations and individuals can donate to the Garden City Fund, NParks' registered charity and IPC, to plant trees. Every \$300 tax-deductible donation will enable you to plant one tree, and the money goes towards supporting research and education programmes to connect people with nature.

For more information, visit  
<https://www.gardencityfund.gov.sg/make-a-difference/contribute>.

GREEN PLAN

# Growing Our City in Nature

### Therapeutic Horticulture

Participate and assist in therapeutic horticulture programmes that use plants and nature-related activities to promote low intensity exercise, stimulate memory, encourage positive social interactions and promote mindfulness.

### Nature Walks

Immerse in the flora and fauna of your neighbourhood, parks and gardens by participating in, assisting or even conducting guided walks for residents in your constituency using our DIY trail guides.

### Community in Bloom

Grow a variety of edibles and flowering plants in your community garden, or an allotment garden in a park near you.

### OneMillionTrees Movement

Participate in, assist or co-facilitate the community-led tree planting events within housing estates for the residents in your constituency.

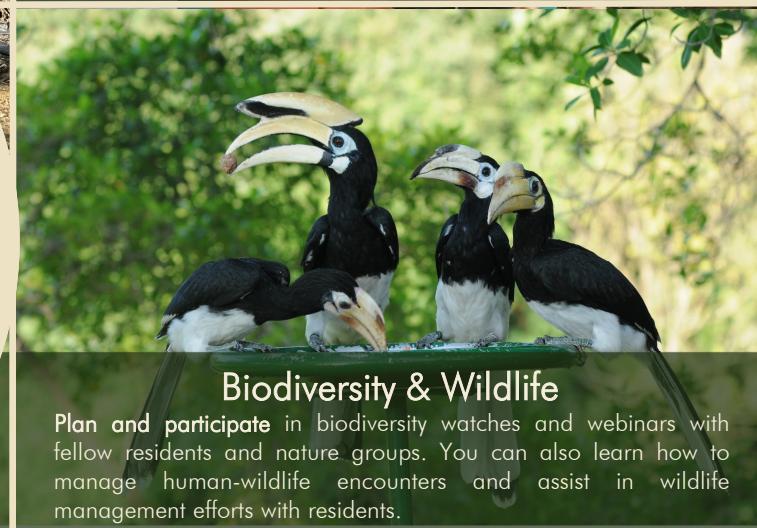

### Nature in Neighbourhood

Brainstorm and create innovative ways for residents to learn more about nature in your neighbourhood, such as by painting a nature mural or organising games to encourage residents to participate in nature-based activities.

## NATURE KAKIS Programmes & Activities

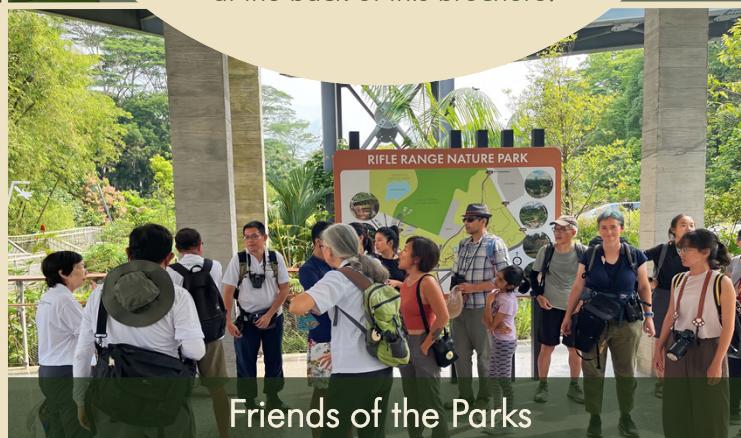

Nature Kakis can participate in and also go one step further to help grow community interest by planning, organizing and implementing a wide variety of activities and programmes. Be one of our Nature Kakis champions and you will get to benefit from capability development, training, knowledge sharing, as well as the chance to build your network and forge relationships with like-minded individuals.

Join us today by scanning the QR code at the back of this brochure.

### Biodiversity & Wildlife

Plan and participate in biodiversity watches and webinars with fellow residents and nature groups. You can also learn how to manage human-wildlife encounters and assist in wildlife management efforts with residents.

### Friends of the Parks

Work with Friends of the Parks to participate in designing and implementing programmes in park spaces and nature areas.

### Community Animals

Engage residents on responsible pet ownership, assist or organise pet-related events and help to encourage stewardship in the responsible care and management of cats and dogs in our community.
